In Oregon's Malheur National Forest, a fungus popularly known as the honey mushroom spreads through tree roots across 2,200 acres, making it the largest living organism ever found. It's been "weaving its black shoestring filaments" through the forest for more than two millennia, killing trees as it grows. Its shoestring filaments, called "rhizomorphs," tunnel as deep as ten feet into the soil. And although the organism is incredibly large, it began with a single microscopic spore!

The Bible tells us of a single act of disobedience that caused widespread condemnation and a single act of obedience that reversed it. The apostle Paul contrasted two individuals-Adam and Jesus (Romans 5:14-15). Adam's sin brought condemnation and death "to all people" (v. 12). Through one act of disobedience, all people were made sinners and stood condemned before God (v. 17). But He had a means of dealing with humanity's sin problem. Through the righteous act of Jesus on the cross, God provides eternal life and a right standing before Him. Christ's act of love and obedience was powerful enough to overcome Adam's one act of disobedience-providing "life for all people" (v. 18).

Through His death on the cross, Jesus offers eternal life to anyone who puts their faith in Him. If you haven't received His forgiveness and salvation, may you do so today. If you're already a believer, praise Him for what He's done by His great act of love!

Brown Rice
Unlike white rice, the brown type contains the bran and germ layers, making it a true whole grain that's rich in fiber, vitamins and minerals.

The impressive fiber content (3 grams per 1-cup serving) can promote satiety and aid weight management, while its low sodium content, along with its potassium, calcium and magnesium, make it DASH diet-approved.

Simple dishes like Easy Brown Rice Pilaf with Spring Vegetables or a Salmon Rice Bowl combine whole-grain brown rice with other ingredients that help support healthy blood pressure, like veggies and fish.

Let God's light shine through you!
